Design Concept

Designed for home theaters and professional AV spaces that demand both visual performance and refined aesthetics, the Grandview Fixed Frame Screen features a classic wide-frame design that complements a variety of interior styles. Compared to narrow-frame models, the wider frame creates a more substantial and elegant appearance while enhancing the overall visual presence of the display.

Wrapped in premium velvet material, the frame effectively absorbs stray light and minimizes reflections, allowing the projected image to stand out with greater contrast and clarity. Available in larger sizes, it is ideal for villas, luxury apartments, private cinemas, multifunction rooms, commercial presentations, and public display environments—delivering lasting durability alongside sophisticated design.

Key Features

Prestige Series, and Ultimate Series designs

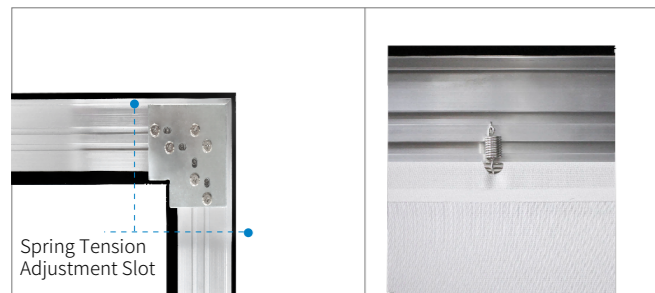

Wide Frame Design

The wide-frame construction creates a bold and refined visual presence while providing greater structural rigidity for long-term stability.

Velvet-Wrapped Frame

The premium velvet-wrapped frame suppresses unwanted reflections and absorbs excess light around the image area, drawing attention to the screen while enhancing perceived contrast. The elegant finish adds a touch of sophistication to any home theater or media room.

Spring Tensioning System

A precision spring-tensioning system applies uniform tension around the entire screen perimeter, effectively preventing sagging, wrinkles, and waves to maintain a consistently flat viewing surface over time.

Hook-Mount Tension Structure

The hook-mount tension design distributes tension evenly across the screen surface, ensuring excellent flatness while simplifying the installation process.
