Cyber Series Ultra Short Throw ALR
Motorized Tab Tension Screen

The ultra-short-throw motorized anti-light screen can realize one-key lifting and lowering without taking up space, with beauty appearance and convenience operation, and the installation method is flexible. With a combination of laser ultra-short-throw projectors, it can still image beautifully in the natural bright environment of the home, large-scale screen projection, simple installation to become a high-end home theater at home.

- Physical Ambient Light Rejection Structure
- Support 4K images
- 140 Wide Viewing Angle
- One-Key Control
- Specialized for UST projectors
- Application: Home theater/Small office

Black grid screen and Matt white screen
comparison

The special micron-scale grid structure on the surface of the black grid screen blocks the upper interference light source, and the light source of the ultra-short-throw projector below is reflected in parallel, and the image quality is clearer and brighter. The ordinary Matt white screen is made of ordinary PVC material, which is rough in workmanship and only works better than white wall.

Product parameter

(Measurement unit:mm)

Aspect Ratio	Diagonal	Viewing Area (W×H)	Total Height (A)	Total Length (L)	Black Drop (B3)	Gain	Viewing Angle	Color Reproduction
16:9 DY3	100"	2214×1245	1902	2672	400	0.5	140°	99%
16:9 DY5						0.6	140°	98%
16:9 DY3	120"	2656×1494	2151	3114	400	0.5	140°	99%
16:9 DY5						0.6	140°	98%

Remarks:DY3,DY5 is high contrast fabric
